Sacred Pilgrimage Through Ancient Egypt with Oliver

11. April - 21. April 2023
This Journey Will Transform You

JOURNEY ITINERARY

The great initiates have watched over the spiritual knowledge of humanity since ancient times. Little is really known of the hidden temples, the pyramids, and the mystery schools of antiquity. The masters and their disciples have guarded this knowledge very much. But in our time the veil that lies over this knowledge is being lifted. We are at the beginning of a new era and are currently creating a New Earth. This journey is as much about learning, as it is about unlearning. Everything you thought was true is not, everything you thought you knew, you don't, everything you thought you could trust you shouldn't. It's as much about destruction as it is about creation. We must destroy our old belief system, brick by brick, layer by layer, and once we drum up enough courage to stand holding on to nothing, we must start creating a new reality. A reality created out of awareness, spirituality, connection, truth and love. It's time to fall in love with life again, but this time, with real life, sovereign life, free life, in touch with who we really are, in community with nature, in cooperation with those around us and in harmony with the Creator. It's time to fall in love with the energy of love itself; the real currency of the world, the true engine, the overall driver, the immortal, indestructible, unbreakable energy that connects us all and makes us one. It's time to fall in love with who we really are; powerful, sovereign, magical, creative beings that thrive in community and cooperation, instead of division and conflict. It's time to become individually and collectively, the best expression of humanity, one that makes us proud to finally reincarnate the divine essence with which we were created. It's time, my friends, to let go of what never was and claim what is and what will always be. ❤️
